PREFACE

The Drug Formulary identifies and lists medications approved by the Pharmacy and Therapeutics Committee (P & T) Committee for stocking in the Pharmacy Service. The P & T Committee recommends professional policy regarding the selection, procurement, storage, control, distribution, use, administration and all matters relating to drugs in the medical center.

The Drug Formulary is organized into two basic sections:

1. Therapeutic Index - of available products, arranged by therapeutic category consistent with the American Hospital Formulary Service (AHFS) numbering system. The Therapeutic Index lists the specific strengths and dosage forms of each drug entity stocked by the Pharmacy Service. The cross-reference of each drug to the AHFS numbering system provides the user with convenient access to comprehensive drug information about each "formulary" drug from the red AHFS volumes located in the patient care areas. The Therapeutic Index commences with a brief overview of the AHFS therapeutic category numbering system and concludes with a listing of Dietary Supplements and Medical Supplies.

2. Alphabetical Index - of available products, arranged by both generic (upper case letters) and trade name (lower case letters) nomenclature. The trade name items are cross-referenced with the appropriate generic name nomenclature. All entities are cross-referenced with both the specific page location number and the AHFS reference number to provide immediate access to both the Therapeutic Index (which lists the available strengths and dosage forms) and the AHFS reference volumes (which contain comprehensive drug information monographs).

Trade name nomenclature which appears in the Drug Formulary is utilized solely to provide a practical cross-reference to the appropriate generic name nomenclature. The actual trade name products stocked in the Pharmacy Service at any given time will vary and are dependent upon federal bid and procurement regulations.

Controlled substances are noted by the appropriate C-II, C-III, C-IV and C-V symbols which reflect the classification assigned by the Drug Enforcement Administration (DEA).

A new edition of the Drug Formulary will be edited, printed and distributed annually. Monthly revisions in the Drug Formulary are listed in the business minutes of the P & T Committee.

FORMULARY POLICY

1. NON-FORMULARY DRUG USE:

No medication shall be used in the treatment of any patient in the medical center unless obtained through the Pharmacy Service. Professional samples and trial samples are not to be used in the medical center. Medications turned in by patients at the time of admission must be processed according to existing medical center policy.

2. NON-FORMULARY DRUG REQUEST:

Authorization for purchase by the pharmacy and approval for the use of a "non-formulary" drug to treat a specific patient may be obtained as follows. The prescribing physician or dentist must complete a Prescription Form (VAF 10-2577d) and have it counter-signed (signifying approval) by both the appropriate service chief and the Chief of Staff.

3. REQUEST FOR FORMULARY LISTING:

A drug may be considered for addition to the Drug Formulary by submitting a properly completed "Drug Request" form (VAF 10-7144) to the Pharmacy and Therapeutics Committee through the Chief, Pharmacy Service (119). All requests received seven (7) days prior to the next regularly scheduled monthly meeting will be researched and placed on that meeting's agenda.

4. CONTROLLED SUBSTANCE PROCEDURE:

Each physician and dentist (including interns, residents and consultants) entering on duty must complete a signature card which includes his/her Drug Enforcement Administration (DEA) registration number. Those practitioners who do not have an individual DEA registration will be assigned an exempt VA number which is valid for use only within the medical center. Each outpatient prescription for a controlled substance must include the prescriber's printed, typed or stamped name, in addition to his/her signature and DEA number. Refills are not permitted for either Schedule II or III controlled substances. Prescriptions for controlled substances cannot be honored by the Pharmacy Service unless they are completed entirely and correctly.

5. SUPPLEMENTAL INFORMATION FOR PRESCRIBERS:

a. Prescription forms are items of potential misuse and every reasonable precaution should be taken to limit their availability. Do not leave blank prescription forms unattended!

5. SUPPLEMENTAL INFORMATION FOR PRESCRIBERS: (Continued)

b. Employee prescriptions are limited to a maximum 72 hours supply, are non-refillable, and must be written by the Employee Health Physician or designee.

c. The Pharmacy Service must have a "signature card" on file before filling any prescriber's prescriptions.

d. Prescriptions cannot be either pre-signed or pre- or post-dated.

e. Directions for use must be complete and specific. "As Directed" and "As Needed" are not acceptable.

f. The prescriber should indicate his/her refill instruction on each prescription even when "no refills" are desired. Prescriptions without any refill notation are subject to refill alterations or forgery.

g. Only approved abbreviations should be used.

h. Generic, rather than trade name, terminology is preferred.

i. The metric system of measure should be used on all orders and prescriptions.

j. Maximum of one medication per prescription form (VAF 10-2577d).

PHARMACY SERVICE INFORMATION

1. HOURS OF OPERATION:

   a. Weekdays (Monday - Friday).....7:00 a.m. - 7:00 p.m.
   b. Saturday, Sunday and Holidays..7:00 a.m. - 5:00 p.m.

2. TELEPHONE EXTENSIONS:

   a. Outpatient Section.....Ext. 235, 467
   b. Inpatient Section.....Ext. 243
   c. I.V. Admixture Section.....Ext. 497

3. LOCATION:

   a. Outpatient Section, Inpatient Section and I.V. Admixture Section.....Room 136
   b. Office of the Chief, Pharmacy Service.....Room 103

4. AFTER-HOURS SERVICE:

   a. The electronic DOCU-MED after hours medication system is utilized to provide small quantities of selected drugs when the pharmacy is closed. The Nursing Service Supervisor has access to the DOCU-MED system and is familiar with its contents and operation.

   b. Telephone operators have the names and telephone numbers of pharmacists to be contacted relative to special or emergency situations.

5. EMERGENCY CARTS:

   a. The emergency carts ("crash carts," "cardiac arrest carts," etc.) which contain emergency drugs and medical supplies are located in patient care areas throughout the medical center.

   b. Special control procedures are utilized to monitor the contents of the carts and to maintain them in a constant state of readiness.

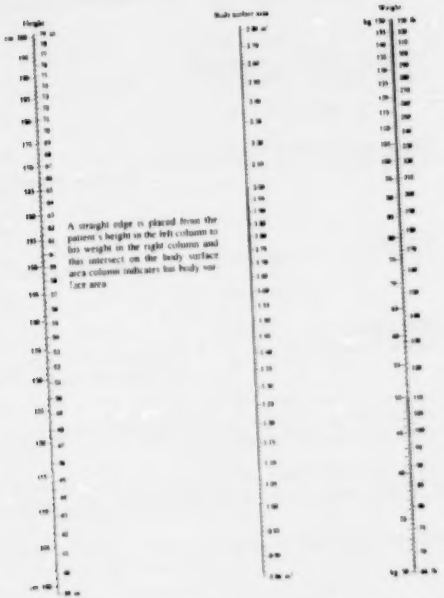
The ALL CLEAR for all of the above will be 1 long blast on the whistle and 7-8 indicated on the visual page.

DO NOT call the operator to inquire if an alarm is a drill. All employees should react to an alarm whether it is a drill or not.

BODY SURFACE AREA OF ADULTS

Nomogram for determination of body surface area from height and weight



Height
Body surface area
Weight
A straight edge is placed from the patient's height on the left column to his weight in the right column and thus intersect on the body surface area column indicates his body surface area

From the formula of Du Bois and Du Bois. *Arch. intern. Med.* 17, 863 (1916): $S = W^{0.425} \times H^{0.725} \times 71.84$, or $\log S = \log W \times 0.425 + \log H \times 0.725 + 1.8564$ (S = body surface in cm^2, W = weight in kg, H = height in cm)
